OBJECTION TO MARINER EAST 2 PIPELINE

Hello, my name is Emilie Moyer and my husband, two young sons, and I live in Nether Providence Township in Delaware County. I am extremely concerned about the proposed Mariner East 2 high pressure NGL pipeline that is planned to be built in my community. I am particularly concerned about what might happen in the event of a leak or explosion. The contents of this pipeline are colorless and odorless, yet they are highly toxic capable of asphyxiation and combustion. These pipelines are known to leak. An explosion in our community would result in many casualties, and of particular concern in the pipelines close proximity to an elementary school. There is no clear notification or evacuation plan for this proposed pipeline. I am writing to let you know that I am very concerned and to ask that the DEP open up another 60-day comment period once Sunoco completes the re-submission of their application. Finally, I am writing to let the Governor know that he must hold a private meeting with members of Middletown Coalition for Community Safety so that he can get a better sense of our community's concerns.

Thank you.
