Title

Web Form Note

I am extremely concerned about the proposed Mariner East 2 high-pressure NGL pipeline planned to be built close to my community, particularly about what might happen during a leak or explosion. The contents of this pipeline are colorless and odorless, yet highly toxic capable of asphyxiation and combustion.

These pipelines are known to leak. An explosion in our community would result in many casualties, and of particular concern in the pipelines close proximity to schools and populated neighborhoods and commercial zones. There is no clear notification or evacuation plan for this proposed pipeline.

Please hold a meeting with members of Middletown Coalition for Community Safety to get a better sense of our community's concerns.
