Web Form Note

Hello, I live in Middletown Township in Delaware County and concerned of the recent approval by our council of Sunoco's Mariner 2 NLG pipeline. My concern is the dangers imposed by this pipeline while Sunoco has one of the worst safety records of the industry. More so, the pipeline is within 850 ft of Glenwood Elementary School. In the event of a disaster, students and facility will have 5 minutes to evacuate. Its just not realistic. I would like to here from the Governor his thoughts and would like to pipeline rerouted away from the school. There simply isn't enough infrastructure in place to permit an orderly evacuation. This project needs to be stopped or re routed.
