

# STAY SAFE

## Local Pollution and Air Quality

Grays Ferry has been affected by nearby pollution from local industrial sites for generations. This pollution can enter your body causing health issues especially for people with underlying health conditions, like asthma.

You can see the current air quality in Grays Ferry from air monitors Clean Air Council has installed, by visiting [map.purpleair.com](http://map.purpleair.com).

## Extreme Heat

Grays Ferry has been identified as an area that is hotter than other parts of the city because of lack of green space. Extreme heat is dangerous, especially for children and elders.

## Stay Informed
